

Baker's trip to New York results in a spectacular entrance

Graham Baker recently went to New York to look at the entrances of swanky hotels and Park Avenue residences, because he feels the entrance is a most important component of a building's exterior design.

This trip inspired this dramatic entry for the St. Clair, including a very sophisticated and elegant conopy of filigreed iron and glass, reminiscent of those at Saks Fifth Avenue, the Plaza, the Pierre and the Sherry Netherland.

Baker is so excited, he decided to give away five trips for two to stay at the Plaza Hotel in New York. Please contact the sales office for more information at 513-0029.

This is one of Toronto's most elegant and upscale condominiums, ideally located at Yonge and St.Clair. The units feature multi level designs with a courtyard, balconies and fabulous amenities. The builder, Barclay Grayon, is well-known to the area and committed to distinctive architecture and excellent quality. Residents of the St.Clair will be able to enjoy the many conveniences of the area, the prestige of an address in such a fashionable area and the luxury of living on a quiet residential street.
